## PERFORMANCE CURVE

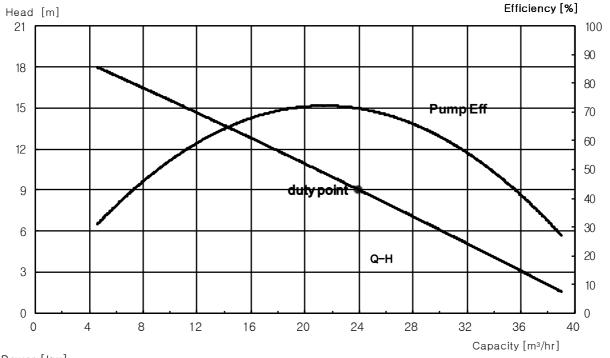

Project No. Rev. No. Date Page No.

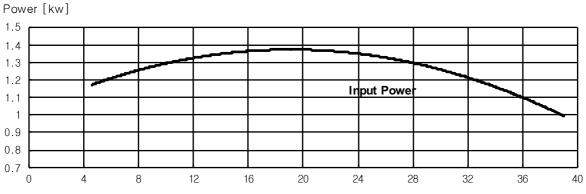

| A. Pump Specification     |                 |      | B. Motor Specification |                  |                     |
|---------------------------|-----------------|------|------------------------|------------------|---------------------|
| 1                         | Rated Head      | 9    | m                      | Power Supply     | 3 Ф x 400 V x 50 Hz |
| 2                         | Rated Capacity  | 24   | m³/hr                  | Rated Power      | 1.5 kw              |
| 3                         | Discharge Dia.  | DN65 | mm                     | No. of Poles     | 2 P                 |
| 4                         | Pump Efficiency | 71   | %                      | Rated current    | 3.3 A               |
| 5                         | Revolution      | 2900 | rpm                    | Insulation class | F                   |
| 6                         | Solid Size      | Ф40  | mm                     | Starting method  | DOL                 |
| 7                         | Imp Dia.        | 140  | mm                     |                  |                     |
| C. Pump Parformance Curvo |                 |      |                        |                  |                     |

## C. Pump Performance Curve

Capacity [m³/hr]

<sup>※</sup> Performance with clear water and ambient temp 20 °C (68°F)
